MONTANA TRACK CLAWS, Incorporated

**NEW
PRE-SEASON
INVENTORY**
Get Them While
They Last!

**Hundreds of
Satisfied
Customers
Coast to Coast**

Track Claws are reusable, quick
connect traction devices that
require no welding or cutting.

Their unique "V" design provides penetrating traction while minimizing side
slippage for improved safety.

Track Claws can be installed in minutes using only a ratchet and socket. No
pad bolts are used in the installation - they bolt through the clean out hole using
a special bottom plate (included) and a zinc plated grade 8 bolt.

Durable and reusable, Track Claws are made of higher grade material than
track pads. Then they are heat treated
creating a durable product that can be
reused many times.

Track Claws are available for all popular
styles of track pads including single,
double and triple grouser bar styles. For
pads without cleanout holes, a template
will be provided.
